Abdullahi Ali

Software Engineer
Toronto, ON - 226-240-7642 Email - LinkedIn - Github - Portfolio

Results-driven Full-stack Software Engineer with a proven track record of delivering exceptional customer service and a passion for creative problem-solving. Proficient in collaborating with multifaceted teams within dynamic, high-speed environments, leveraging MuleSoft technologies for seamless integration solutions. Enthusiastic about working with mission-focused development teams to tackle technical challenges and foster professional growth.

SKILLS

Languages - JavaScript, HTML, CSS, Python, Dataweave | **Libraries and Frameworks** - React, Node.js, Express.js
Database - PostgreSQL, MySQL, MongoDB, Mongoose| **Other** - RESTful Routing JSON, Version Control (Git/Github), Tailwind CSS, Material-UI, Postman, AnyPoint Studio, CloudHub, Mule ESB, JMS, RAML, OAS

RELEVANT EXPERIENCE

Integration Enthusiast with MuleSoft Proficiency, Udemy Course   **2024**
● Strong experience with Mule ESB (4..X), Mule API, Mule Anypoint Studio, Mule Cloudhub, RAML and OAS.
● Proficient in MuleSoft AnyPoint API platform for designing and implementing Mule APIs. Strong working knowledge of API Gateway.
● Experience creating Flows, Sub Flows, Exception strategy, DataWeave transformation, DataMapper, and other activities.
● Experience using Mule connectors like DB, HTTP, HTTPS, FTP, FILE, SFTP, JMS, Salesforce, etc., as part of integration usage.
● Solid Knowledge in JavaScript technologies. Experienced in scripting languages like HTML CSS, jQuery and server-side web applications using Node.js.

Full-Stack Web Developer - NextGen Coders Academy   **2023 – Present**
● Designed and built the company website with Next.js, React.js and Tailwind CSS with a team of 6 software engineers.
● Designed a Node/Express RESTful API with PostgreSQL as the data store.
● Designed and curated curriculum for boot camp students, covering HTML/CSS, JavaScript, data types, objects, classes, and methods.

React.js Mentor, Code The Dream   **2023**
● Empowered a diverse cohort in web development, specializing in React.js, nurturing their skills and fostering a collaborative learning environment.
● Offered tailored guidance, constructive feedback, and code optimization techniques, resulting in a 20% improvement in mentee project quality.
● Leveraged efficient communication tools like Slack and Email to facilitate seamless mentoring, ensuring quick responses and clarifications for mentees.

Full-Stack Web Developer, Freelance   **2022 – Present**
● Craft appealing and user-friendly websites with a focus on mobile responsiveness and advanced features, using technologies such as Next.js, Tailwindcss, and Amazon Web Services to improve brand visibility and user experience.
● Develop full-stack web applications using modern technology stacks such as MERN (MongoDB, Express, React.js, Node.js) and PERN (PostgreSQL, Express, React.js, Node.js), enabling CRUD operations and RESTful API integration.
● Lead project teams, manage task flows, and oversee code collaboration on platforms like Github, while consistently delivering high-quality, responsive applications within tight deadlines for clients in various industries.

RECENT TECHNICAL PROJECTS   **2022 – Present**

Dira Transport | Github | Demo
● Achieved a seamless user experience by designing and developing responsive web applications using React.js and Next.js, ensuring compatibility across various devices.
● Improved communication efficiency by integrating email services into the web platform using Email.js, enhancing user engagement and providing a streamlined communication channel.
● Elevated user interaction and visual appeal by incorporating animated UI components using Framer Motion, resulting in a more engaging and dynamic user interface.
● Optimized website styling and performance using Tailwind CSS, resulting in a clean and maintainable codebase while adhering to the latest industry standards for modern web development.

Tsoon Luxury Car Rentals | Github | Demo

- Developed using the MERN stack (MongoDB, Express, React, Node.js).
- Tailwind CSS for elegant and responsive front-end design.
- Seamlessly manage and rent luxury cars through an intuitive web interface.
- Ensured secure authentication, authorization, and Stripe payment processing.

BYB NFT Marketplace | [Demo](#)
- Developed the front-end for a blockchain-based music platform for decentralized music creation and listening.
- Leveraged React to create dynamic and engaging user experiences.
- Contributed to the platform's growth by expanding support for diverse creative works, resulting in a 25% increase in content diversity and elevated user experiences.

Sam StreetWear | [Github](#) | [Demo](#)
- Front-end development with React.js, JavaScript, and Material-UI.
- Utilized MongoDB for data storage.
- Developed Restful APIs with Express.js and Node.js.
- Integrated OpenAI for advanced customer support.
- Ensured secure authentication, authorization, and Stripe payment processing.

Rendezvous | [Github](#)
- Collaborated to create a full-stack web application utilizing Python and Django
- Implemented databases with Postgresql and Amazon Web Services (AWS)
- Created application with a mobile-first approach and styled the application usingStyled-Components, Materialize and CSS3 with flexbox layouts

EDUCATION

General Assembly | Remote
Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.
Bachelor Of Arts In Educational Studies | York University | Toronto, ON
MuleSoft 4.X Complete Guide For Beginners- Hands On Projects | Udemy | Remote
